

# Agile Leadership

**Strengthening Adaptive Decision-  
Making and Agile Ways of Working**  
*CPD-Accredited Course*

# Introduction:

This course equips leaders and professionals with the knowledge, mindset, and practical tools to contribute to organisational shifts from rigid, bureaucratic operating models to more agile, adaptive, and responsive ways of working. It recognises the realities of operating within existing structures while enabling change from where one is positioned.

Grounded in contemporary leadership theory and agile principles, the programme explores how leadership behaviours, decision-making practices, and organisational systems influence agility. Through structured reflection and applied planning activities, participants identify barriers to agility and develop practical approaches to support strategic flexibility, collaboration, and sustainable cultural shift.

## Who is this course for:

- **Executives**
- **Managers**
- **Leaders**
- **Professionals**

# Training Outcomes:

At the end of this workshop, leaders will:

- 01** Explain the principles of agile leadership within complex organisational environments.
- 02** Distinguish between bureaucratic and agile organisational structures and leadership approaches.
- 03** Analyse how leadership behaviours, systems, and governance enable or constrain organisational agility.
- 04** Apply agile leadership principles and selected agile management practices to real-world contexts.
- 05** Develop a practical plan to support organisational transition toward agility and cultural shift.
